Memory from Christopher John Cummock
I only have a few memories of my father, as I was only 6 when he was killed. I remember that on many days, when he came home from work, my siblings and I would all grab and sit on his legs like fireman's poles, while he walked around the house like he was the Jolly Green Giant. Dad was over 6' 3" tall, so it was always like getting on a fun fair ride at home, on those days! My Dad had an amazing heart and endless love to give. I miss him every day and will always cherish his memory in my heart.

Memory from Carisa Harris Adamson
I remember my Uncle as a kind, gentle soul who was always welcoming and fun to visit. My fondest memory of him was when I had to build two small cars for a skit in a grade school talent show. I was visiting him and my Aunt Vicky and was worried that I wouldn't have enough time to get the cars built when getting back home that evening. Uncle John helped me build the cars at his house. We collected all sorts of materials and put the cars together that afternoon.

Memory from Jorge Risco
John Bining Cummock was an exceptional human being. Truly he was, in all aspects: as the head of a family, as a successful and respected professional, and as a community member. He also shined as a person; as a close, trustworthy and gentle friend to me and my family.
